

STEPS TO ADDRESS CORONAVIRUS (COVID-19)

PROTECTING THE HEALTH AND SAFETY
OF OUR CUSTOMERS, EMPLOYEES AND
WORK ENVIRONMENT.

- PREVENTION PLANS
- PANDEMIC PLANS
- CDC/WHO EDUCATION
- MANDATORY PROTOCOLS

TAKING ACTION

With the recent coronavirus (COVID-19) outbreak, Coast Pneumatics is taking action and has implemented prevention and pandemic plans in effort to keep customers, employees and the workplace healthy, safe and informed. The company is closely monitoring the latest reports and will act in accordance with the precautionary measures provided by the CDC and WHO.

Internally, Coast Pneumatics has implemented mandatory protocols and procedures to ensure increased hygiene and safety within the workplace and work environment. The company has educated all employees on the best practices that are recommended by the CDC and WHO. Disinfecting and cleaning all surfaces, stations and frequently touched objects daily is an example of a protocol that has become mandatory within the company. From sales desks to the shipping and receiving center, Coast Pneumatics is taking necessary measures to address the virus, minimize potential spread and protect the safety of customers, employees and business operations.

Externally, it can be expected that the virus will have a significant impact on industries like medical, pharmaceutical, food and more. The regulations and protocols within industries like these are likely to become more strict and enforced due to the outbreak. Coast Pneumatics has gathered a range of pneumatic and electric automation products, systems and brands that will ensure to power operations of industries like these safely and efficiently. Additionally, the company keeps a range of products in-stock at its 10,000 sq. ft. inventory room in California. Coast Pneumatics is working closely with our partners, manufacturers, vendors and more to maintain the flow of products and operations.
